Gene Krupa

DRUM METHOD

You are holding in your hands the first drumset method ever written! In 1938, as the drumset was first making its mark on the face of modern music, Gene Krupa wrote this method to help teach the world to "Sing, Sing, Sing." After nearly 70 years, it is a testament to Gene's genius that much of this drum method is as relevant today as it was when it was written.

With an in-depth study of the mechanics of snare drum playing and military rudiments, this book offers a solid foundation for the beginning drummer to build upon. The sections on bass drum, hi-hat, and cymbal playing offer a unique glimpse into Gene's masterful approach to the drumset in its infancy.

Gene Krupa is widely considered to be the "father" of the modern drumset. He was the first drummer to record a bass drum played with a foot pedal and was instrumental in the invention of the modern-day hi-hat and tunable tom-toms. With his work with the Benny Goodman band and his famous drum solo on "Sing, Sing, Sing," Gene is credited with playing the first extended jazz drum solo and bringing the drumset to the forefront of the band, paving the way for the predominant role it plays in today's contemporary music.
